## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

#### In Reference to Claims 2 and 11

The claim recitations to the calculation of " an auto-correlation function of **temporally correlated** and **spatially uncorrelated** tissue and flow receive signals" contradict the rest of the disclosure. The earlier disclosed subject matter specifies that the resulting receive flow and tissue signals are **temporally uncorrelated** and **spatially correlated**, not vice versa.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 2 and 11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which

Art Unit: 3768

was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In Reference to Claims 2 and 11

The claim recitations to the calculation of " an auto-correlation function of **temporally correlated** and **spatially uncorrelated** tissue and flow receive signals" contradict the rest of the disclosure. The earlier disclosed subject matter specifies that the resulting receive flow and tissue signals are **temporally uncorrelated** and **spatially correlated**, not vice versa.

***Allowable Subject Matter***

5. Claims 1, 3-10 and 12 are allowed.
6. Claims 2 and 11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
7. The following is a statement of reasons for the indication of allowable subject matter:

In Reference to Claims 1, 3-10 and 12

In the ultrasound imaging system and corresponding method according to claims 1 and 10 respectively, the corresponding claim (1 and 10) limitations with

respect to filtering of the multiple receive beams to extract the temporal variation of flow motion in terms of the spatially nearby receive beams was not found to be anticipated by the prior art. **Specifically:** the inclusion of a "separation means comprising adaptive spatial tissue filtering means, using simultaneously more than one spatial receive beam signals acquired in 3-D within the ensemble length of more than two temporal samples, for analyzing temporal variations of the respective successive receive signals and for extracting flow receive beam signals from spatial combinations of receive beam signals" in combination with the other claim 1 and 10 (respective) limitations was not found or fairly suggested by the prior art.
